

SPHINX+TOOLS

Sphinx Tools Ltd.: Your partner for highest precision

We are a leading company in the manufacture and distribution of precision tools for machining production. Only the best quality is good enough for us and our customers.

Our strong global positioning is the result of continuous growth, systematic reinvestment in the production plants – and the untiring dedication of our employees. Both in Swiss production and in global distribution. You as the customer are the focus of our commitment. We orientate ourselves systematically to your requirements, and adjust our concepts and procedures to

your needs. Many reputed companies from industry and medical technology rely on our quality and experience. Thanks to strong customer focus and extensive knowledge we can also solve the more complex assignment of tasks. Feedback shows how our innovative solutions have contributed significantly to our customers' marketing success. We are pleased about this – and it encourages us to continue to perform at our best. Also on your behalf!

Catalog products

We know which tools are needed most often – and keep plenty of

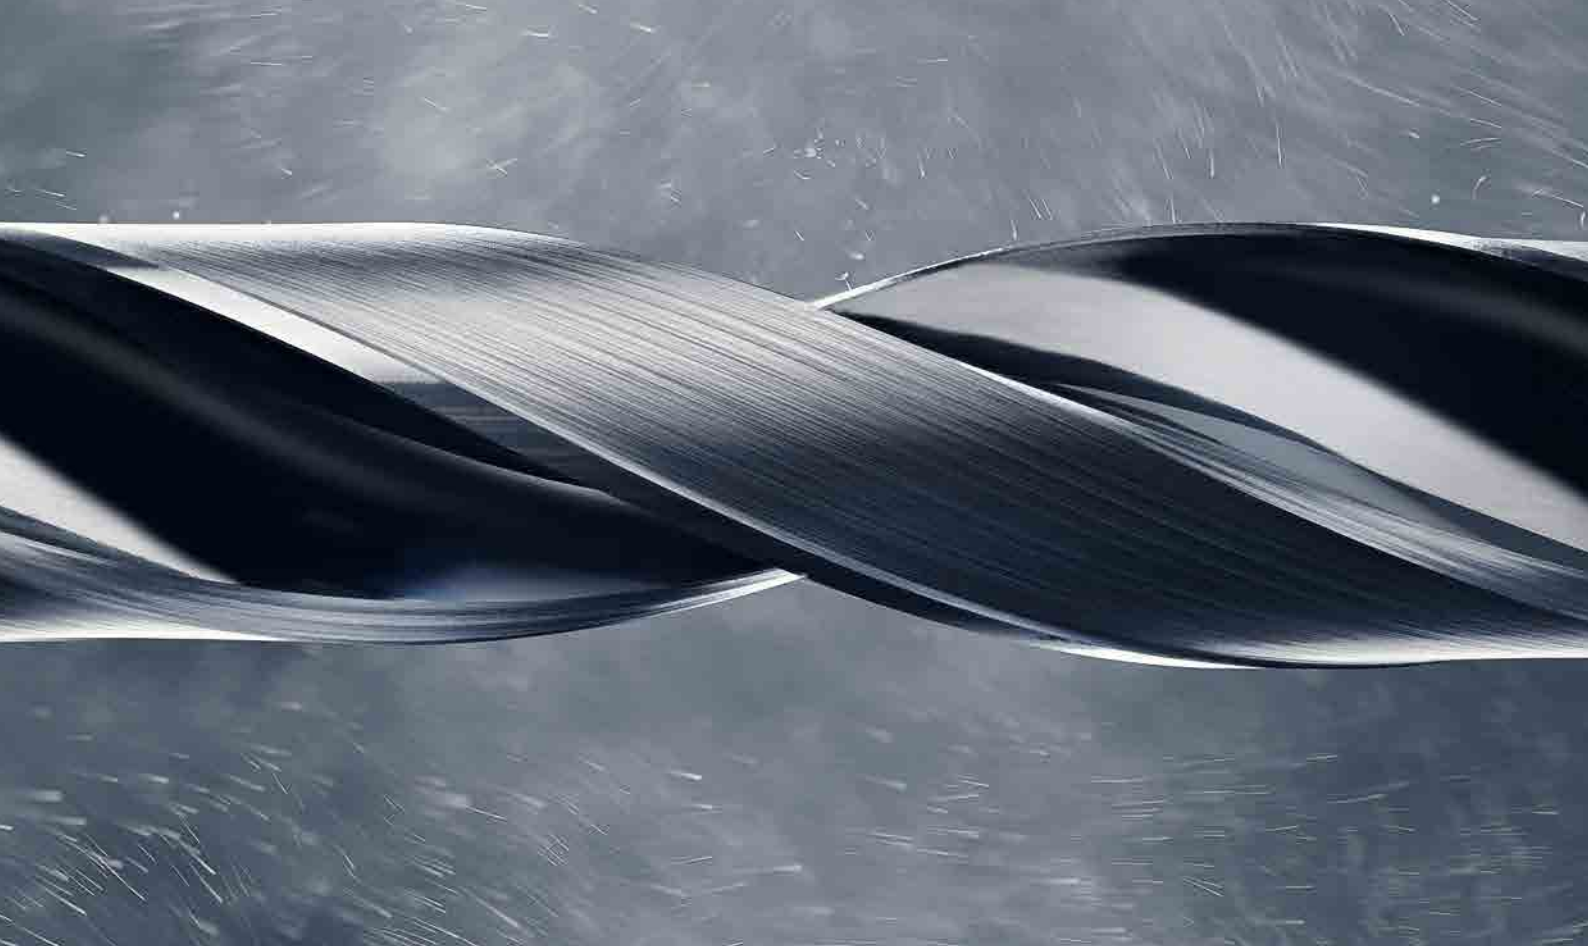

them in stock. You will quickly find the tool you need from us. Thanks to the E-Shop, printed catalog and the competent advice.

We provide the right tool for the right application – and offer an all-round service, also after the sale. Sphinx Tools Ltd. is the right partner if you need innovative solutions for machining.

Swiss quality thanks to Swiss manufacture

All Sphinx products are developed and manufactured entirely in Switzerland. We master and manage the

whole value added chain. You benefit from certified quality, comprehensive advice, and unconditional reliability.

Special tools

Sometimes difficult machining operations cannot be done effectively or economically using the existing tools. This is where our custom-made special tools can help.

Highest precision for maximum utility

We see ourselves as a partner for uncompromising precision – and consistently apply our quality standards. For example, we do funda-

mental research ourselves, and we have established our own considerable expertise within our company. We know about the materials that you use, and how they can be processed effectively. The procedures at Sphinx are well-structured and subject to multiple forms of quality assurance.

Sphinx Tools Ltd.: 100% Swissmade

We have been manufacturing precision tools for the machining industry since 1994 – and in doing this we consistently promote Switzerland as a center of industry.
